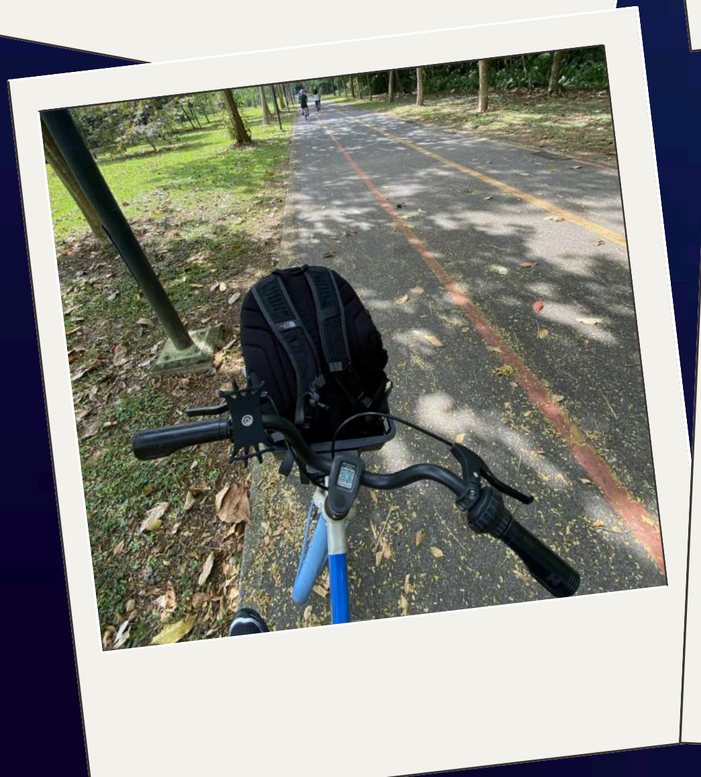
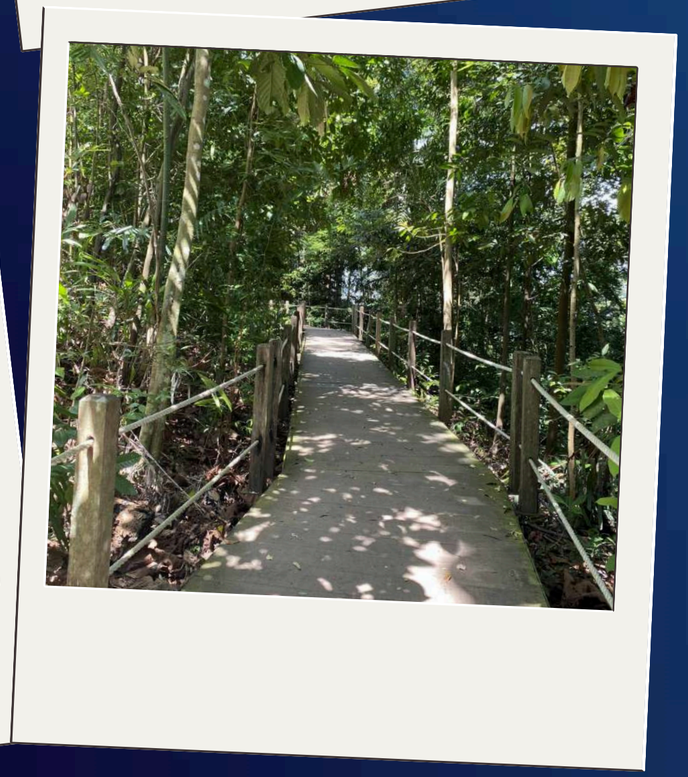
PAULO JOAQUIN SERDONCILLO EVIDENTES

An Aerospace Engineering Student

BS-AE 3B
VOL. 1 | JANUARY 2026



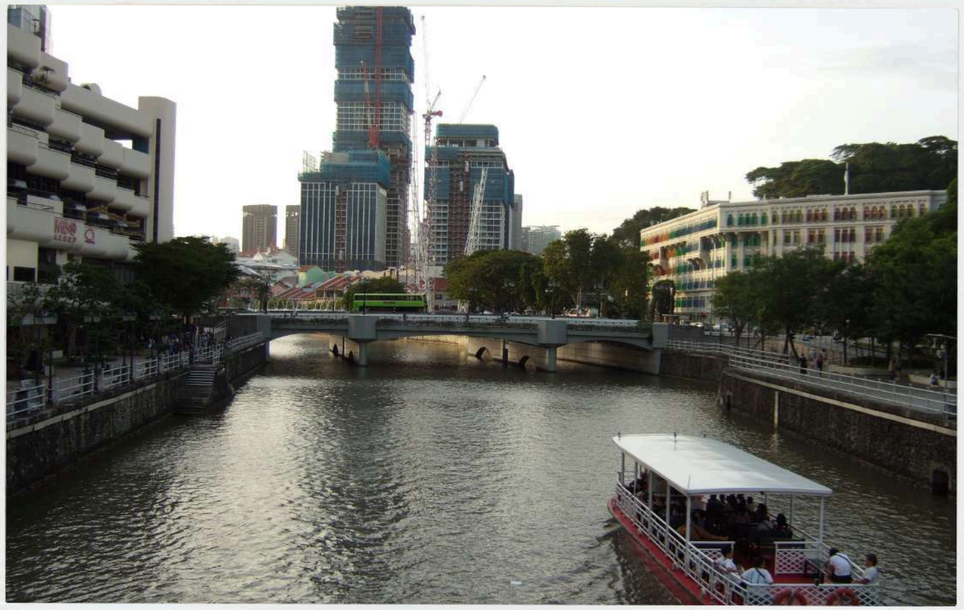


Who is Paulo?

I am a resident of General Santos City, born on December 4, 2004. Currently, I am a third-year student pursuing a Bachelor of Science in Aerospace Engineering. Outside of my academic commitments, I am an active enthusiast of outdoor activities, including hiking and sports, and I possess a keen interest in photography.

What Drives Me

I thrive at the intersection of technical precision and the great outdoors. Whether I am navigating the complexities of aerospace systems or the rugged terrain of a mountain trail, I am motivated by the pursuit of new heights and growth.



My Goals

My ultimate goal is to achieve financial independence and maintain physical and mental health. I strive for a life defined by peace and happiness, using my technical skills and talents to serve those around me. By sharing my knowledge and living by example, I hope to empower my community and lead a life of meaningful impact.

THANK YOU!

from Paulo, an Aerospace Engineering student
